## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2 and 5-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Nobori et al (US 5,616,024).

Nobori et al shows the ceramic heater claimed including a ceramic substrate, a plurality of heating element with a mixture of concentric or spiral pattern and a pattern of a repeated winding line in the peripheral portion of the ceramic substrate. Nobori et al further discloses the ceramic substrate made of nitride and carbide ceramic with the through holes for providing lifting pins. The heating element made of metal would inherently have metal particles therein.
